LTI Automated Tracking Solution

Digitize your Supply chain

As technology continues to revolutionize the way business is done today, organizations often neglect the critical part i.e. Visibility beyond their boundary walls. Telematics-based systems are hardware-intensive, which makes them unwieldy to operate on a large scale due to high Capex. LTI's 'Automated Tracking Solution' is an end-to-end solution platform that fuses innovation with agility and precision, as required by supply chain operations, to help organizations save cost, and achieve greater performance.
